Special Issue

Mechanisms and regulation of organic matter stabilisation in soils

Edited by

I. Kögel-Knabner, M. von Lützow, H. Flessa, G. Guggenberger, B. Marschner, E. Matzner and K. Ekschmitt

Editorial

Mechanisms and regulation of organic matter stabilisation in soils
I. Kögel-Knabner, M. von Lützow, H. Flessa, G. Guggenberger, B. Marschner, E. Matzner and K. Ekschmitt 1

Research papers

Carbon-13 natural abundance as a tool to study the dynamics of lignin monomers in soil: an appraisal at the Closeaux experimental field (France)
M.-F. Dignac, H. Bahri, C. Rumpel, D.P. Rasse, G. Bardoux, J. Balesdent, C. Girardin, C. Chenu and A. Mariotti. 3

A molecular method to evaluate basidiomycete laccase gene expression in forest soils
P. Luis, H. Kellner, F. Martin and F. Buscot 18

Stability and composition of different soluble soil organic matter fractions–evidence from $\delta^{13}C$ and FTIR signatures
R.H. Ellerbrock and M. Kaiser 28

Priming effects in soils after combined and repeated substrate additions
U. Hamer and B. Marschner 38

Initial characterization of processes of soil carbon stabilization using forest stand-level radiocarbon enrichment
C.W. Swanston, M.S. Torn, P.J. Hanson, J.R. Southon, C.T. Garten, E.M. Hanlon and L. Ganio 52

Storage of organic carbon in aggregate and density fractions of silty soils under different types of land use
B. John, T. Yamashita, B. Ludwig and H. Flessa. 63

Soil wettability, aggregate stability, and the decomposition of soil organic matter
M.-O. Goebel, J. Bachmann, S.K. Woche and W.R. Fischer. 80

Transformation of organic matter in agricultural soils: radiocarbon concentration versus soil depth
J. Rethemeyer, C. Kramer, G. Gleixner, B. John, T. Yamashita, H. Flessa, N. Andersen, M.-J. Nadeau and P.M. Grootes. 94

Poorly crystalline minerals protect organic carbon in clay subfractions from acid subsoil horizons
R. Mikutta, M. Kleber and R. Jahn 106

Morphological and chemical properties of black carbon in physical soil fractions as revealed by scanning electron microscopy and energy-dispersive X-ray spectroscopy
S. Brodowski, W. Amelung, L. Haumaier, C. Abetz and W. Zech. 116

The role of plants and land management in sequestering soil carbon in temperate arable and grassland ecosystems
R.M. Rees, I.J. Bingham, J.A. Baddeley and C.A. Watson. 130

Effects of sand and litter availability on organic matter decomposition in soil and in casts of *Lumbricus terrestris* L.
S. Marhan and S. Scheu 155

Strategies used by soil biota to overcome soil organic matter stability — why is dead organic matter left over in the soil?
K. Ekschmitt, M. Liu, S. Vetter, O. Fox and V. Wolters 167

Special Issue

Pedometrics 2003

Edited by

M.A. Oliver and R.M. Lark

Preface 177

Research papers

Geostatistical modelling of spatial processes on directed trees: Application to fluvisol extent
P. Monestiez, J.-S. Bailly, P. Lagacherie and M. Voltz 179

The Matérn function as a general model for soil variograms
B. Minasny and A.B. McBratney 192

Study of the spatio-temporal variation of soil moisture under forest using intrinsic random functions of order *k*
G. Buttafuoco and A. Castrignanò 208

Effect of long-term irrigation application on the variation of soil electrical conductivity in vineyards
W.P. de Clercq and M. Van Meirvenne 221

Soil salinity mapping using spatio-temporal kriging and Bayesian maximum entropy with interval soft data
A. Douaik, M. Van Meirvenne and T. Tóth 234

Rapid estimation of soil variability from the convex hull biplot area of topsoil ultra-violet, visible and near-infrared diffuse reflectance spectra
K. Islam, A. McBratney and B. Singh 249

Analysing the space–time distribution of soil water storage of a forest ecosystem using spatio-temporal kriging
G. Jost, G.B.M. Heuvelink and A. Papritz 258

An algorithm for fuzzy pattern matching to allocate soil individuals to pre-existing soil classes
P. Lagacherie 274

Principal component analysis as a tool to indicate the origin of potentially toxic elements in soils
L. Borůvka, O. Vacek and J. Jehlička 289

Probabilistic quality standards for heavy metals in soil derived from quality standards in crops
D.J. Brus, J.J. de Gruijter and P.F.A.M. Römkens 301

BME-based uncertainty assessment of the Chernobyl fallout
E. Savelieva, V. Demyanov, M. Kanevski, M. Serre and G. Christakos 312

The spatial prediction of soil mineral N and potentially available N using elevation
S.J. Baxter and M.A. Oliver 325

Digital terron mapping
F. Carré and A.B. McBratney 340

Exploring the spatial relations between soil physical properties and apparent electrical conductivity
Z.L. Carroll and M.A. Oliver 354

Contents Volume 128, 2005 375
